

# Sports Medicine Concepts' 2013 Sports Emergency Care Curriculum Offers Something To Help Every Athletic Trainer Become Better *Prepared to Respond Flawlessly™*

**On-Line Live Staff Professional  
Development Training**

**On-Line Live ATEP  
Programming**

**Recorded Sessions Library**

SMC's on-line sports emergency care curriculum includes didactic webinars that are practically based; featuring demonstration video and actual images from SMC's unique Situational Scenario tests. SMC's on-line learning labs facilitate webinar programming with live demonstrations of vital techniques and concepts in a form that allows instructors to answer questions using specific demonstration. Best of all, SMC programming can be scheduled specifically for your staff or students, at your convenience! Or visit our recorded sessions library that is available 24/7!

## **SMC' 2013 On-Line SEC Curriculum**

- Advances in Protective Athletic Equipment  
– Implications for On-Field Emergency Management (LL)
- Indication for Use of BLS/ALS Airway Adjuncts (LL)
- Basic O-M and V-M Screening and Rehab Following Concussion (LL)
- Balance Assessment and Rehabilitation Following Sports Concussion (LL)
- Special Considerations—Youth Athletics
- Pharmacology and OTC Drug Interactions
- Internal Injury

**“I really appreciate what SMC does to stay on top of things with new topics and programs that are always evolving to build and progress our profession”**

*Amy Chamberlain, MS, AT, ATC, CSCS
