

PROGRAM CONSIDERATIONS

We are comfortable with our current level of preparedness. How would this program benefit us?

Our proven process will provide your team with updated current best-practice EAP standards and provide performance feedback to ensure your team is prepared to deliver elite critical care when it matters most. Our program also ensures compliance with all league requirements and facilitates submission of your EAP for league review.

Who Should Attend?

Minimally, you should ensure that your staff athletic trainers, team physician, paramedic, EMTs, airway management physicians, and trauma physicians are present. We encourage you to also plan to have your visiting team medical liaison, independent neurologists, security personnel, player personnel representative, and season interns attend.

What do we need to provide?

SMC will provide all administrative needs, staffing, staff travel and accommodations, and all equipment required for the practicum. You should plan to have all your BLS and ALS equipment on hand to use during simulation training and auditing.

Freight and Materials Handling

Program materials will be delivered within 7d of program date and will be picked up within 48h following program completion. Freight is handled by LTL carriers. Please arrange a secure and convenient location for freight delivery and storage. Additional freight charges will apply when special delivery and material handling needs are required.

Program Booking and Cancellation

Payment in full is due within 90 days of program date. No refunds will be granted for cancelled programming.

Sports Medicine Concepts, Inc. (BOC AP#: P1126-2037) is approved by the Board of Certification, Inc. to provide continuing education to Athletic Trainers. This program is eligible for a maximum of 8 Evidence-Based Practice hours/CEUs. ATs should claim only those hours spent in the educational program.

Transforming Highly Trained Medical Personnel Into

|FLAWLESS|

Elite Life-Saving Medical Teams Since 1995

THE CURRICULUM

CHOREOGRAPHY, SIMULATION & BENCHMARKING

Your sports medicine team is comprised of highly-skilled medical specialists who come together to provide elite care in the very demanding and high-profile XFL environment. It is not enough to simply have specialized skills. Your multi-disciplined medical team needs to know how to effectively choreograph their specialized skills. The ultimate test of effective choreography is the ability to consistently meet critical care benchmarks during management of the critically injured athlete. Sports Medicine Concepts' proven process uses a unique mobile simulation practicum that incorporates the latest hi-fi patient simulators programmed with proprietary simulation scenarios that have been developed over more than 25 years of elite sports emergency care training experience.

SMC's proven process for developing **|FLAWLESS|** life-saving medical teams is unrivaled.

Seizure/RSI Simulation with Indianapolis Colts' Medical Team

PROGRAM PEDAGOGY

In 2Min or Less!® is designed to provide for mastery of all critical care psychomotor skills and best practice safe handling techniques, and to provide sports medicine team members with a unique opportunity to evaluate application of critical care techniques during true-to-life scenarios. The concept is to see first-hand where critical breakdowns in emergency response occurs and to get medical teams to **THINK LOGICALLY** about which critical care skills and safe handling options are most appropriate in each unique injury scenario, rather than focusing on emergency response dogma.

In 2Minutes or Less!® uses a unique on-site mobile simulation practicum featuring the latest hi-fi patient simulators running proprietary injury scenario programs to provide venue specific training and measure medical team performance against established emergency response benchmarks.

The In 2Minutes or Less!® program will provide for game day, training camp, and regular season practice management of:

- Pre-Event Medical Meeting
- Equipment removal techniques
- Pre-hospital and ER safe handling
- Spine/Neurological injury
- Head trauma
- Airway management
- Cardiac arrhythmia
- HQ-CPR
- Internal injury
- Integration of AT, EMS, and ER during pre-hospital care and throughout entire spectrum of care

Optional Elective Break-Out Topics

- Heat stroke
- Anaphylaxis
- Sickle Cell
- Hypo/Hyperglycemia
- Fracture/Dx
- Bleeding

Texan's Full Crash HQ-CPR Simulation

AUDIT REPORT

In 2Minutes or Less!® includes a complete EAP audit that ensures compliance with all league requirements and facilitates EAP submission for review by the league's retained EAP experts. Each team is also provided an ancillary rehearsal guide to steer additional rehearsal activity requirements. The complete audit report is comprised of an EAP summary, rehearsal, equipment readiness, and competency documentation which conspire to provide our **|FLAWLESS| Certification®**.

Team EAP information is managed by TeamEMS Soft®, SMC's feature rich EAP software application that facilitates EAP program administration, management and sharing.

TYPICAL SCHEDULE

**Schedules can be adjusted to meet your scheduling needs*

8am-9am: EAP essential elements and safe handling
9am-10am: EAP critical care choreography
10am-11am: Injury practicum
11am-12pm: Simulation and peer debriefing
12pm-1pm: Lunch
12:30-2:30pm: Optional elective break-outs
2:30pm-3:30pm: EAP audit
3:30pm-3:45pm: Break
3:45pm-4:45pm: Audit review
4:45pm-5pm: Program assessment and conclusion

ON-SITE AND FOCUSED

Programming Fees:

Regional Calendar Date: \$6,999.00

Non-Regional Calendar Date: \$9,999.00
